 **Capi senza cuciture**, realizzati con filati in Nylon, Lycra, Tactel e Meryl (certificati Dupont), arricchiti dalla **speciale lavorazione fasciante** del tessuto nelle zone più sollecitate dall'attività muscolare.

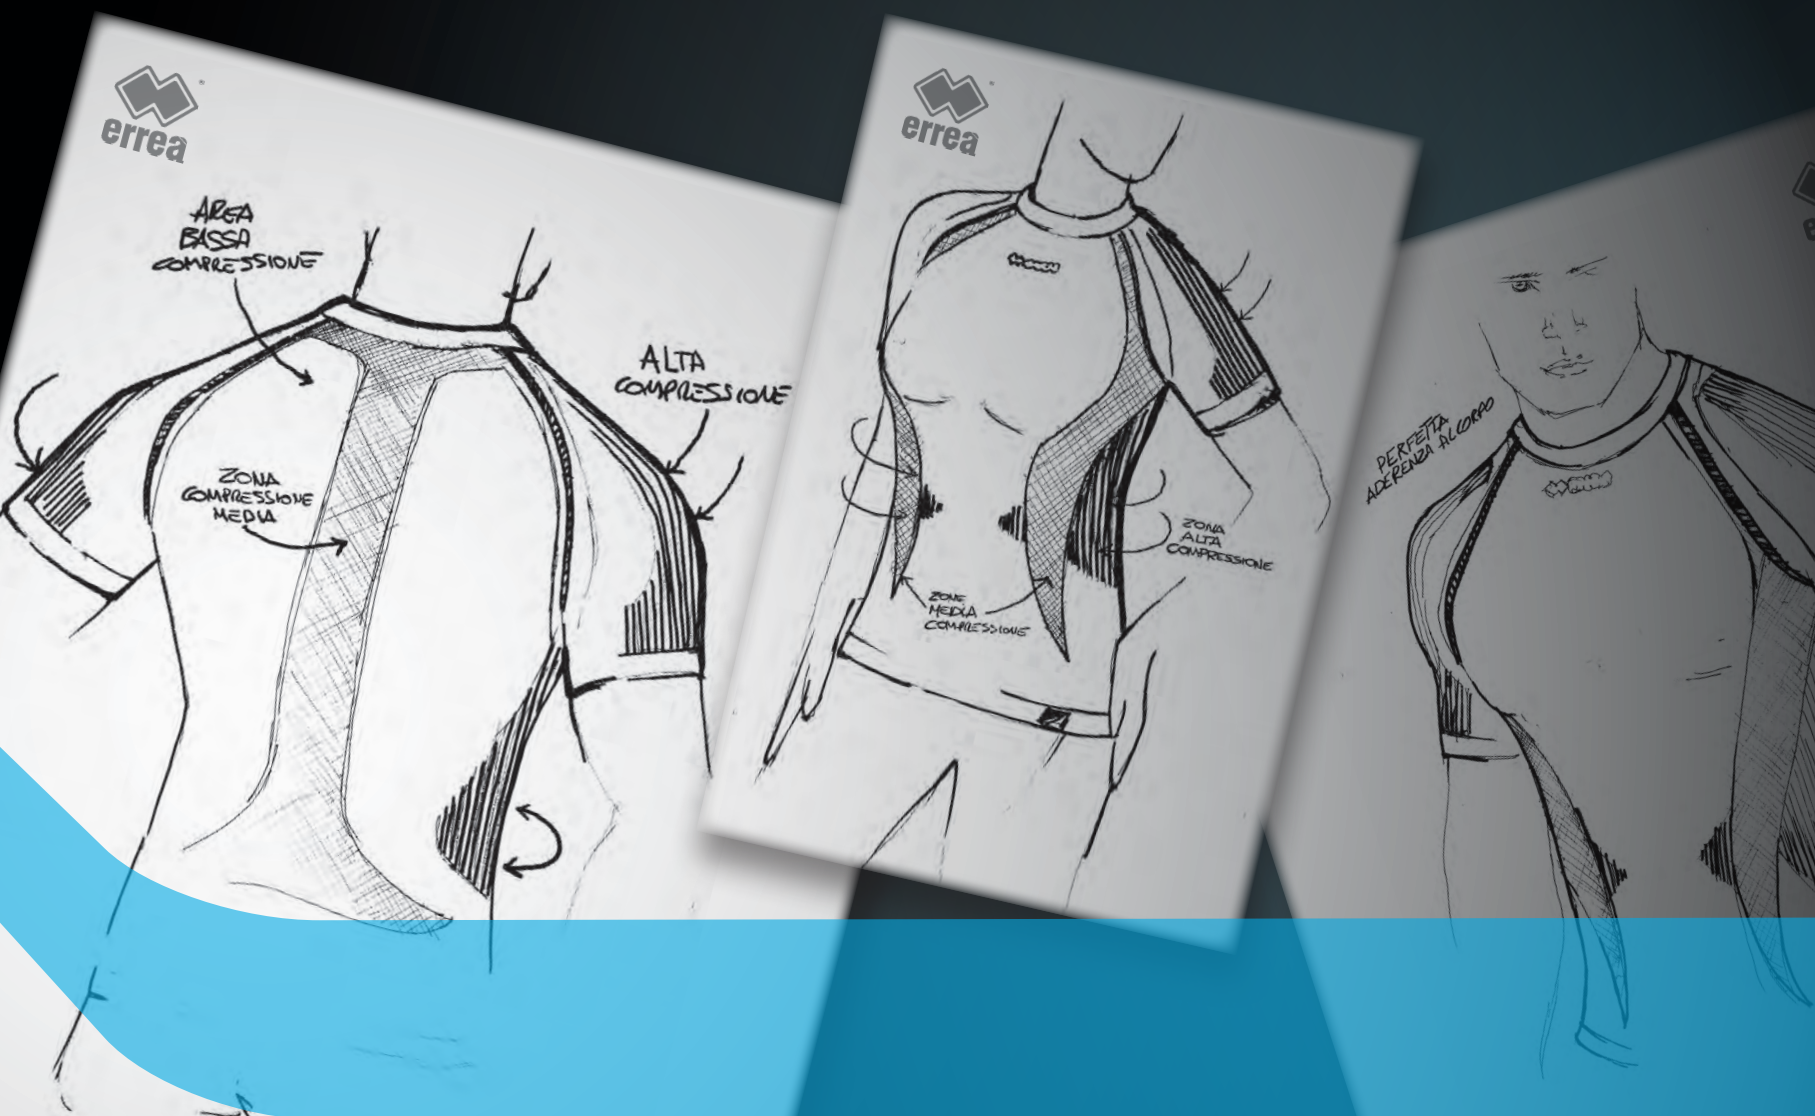

L'effetto compressione così ottenuto fa aderire perfettamente i capi al corpo, riduce le vibrazioni e assicura il mantenimento della giusta pressione muscolare, aumentando così la potenza ed impedendo la dispersione di energia. **La compressione dei muscoli favorisce il recupero fisico** consentendo un più rapido riassorbimento dell'acido lattico. Ergonomia, libertà di movimento e riduzione del dispendio fisico-energetico.

 **Seamless garments**, made with Nylon, Lycra, Tactel and Meryl (Dupont certified) yarns, combine with **specialised manufacture of the fabric to provide support** to the muscles.

This compression effect provides a perfect fit of garment to body, reduces vibration and assures the maintenance of the correct muscular pressure, thereby providing increased power and helping to prevent energy loss. **Compression of the muscles allows for faster physical recuperation** and absorption of lactic acid. The Compressor garments are ergonomic, accentuate freedom of movement and reduce loss of physical energy.

 **Produits sans couture**, réalisés avec des filés en Nylon, Lycra, Tactel et Meryl (certifiés Dupont), enrichis par **l'élaboration spéciale maillotement du tissu** dans les zones les plus sollicitées de l'activité musculaire.

L'effet de compression ainsi obtenu fait parfaitement adhérer les produits au corps, réduit les vibrations et assure le maintien de la juste pression musculaire, augmentant la puissance et empêchant la dispersion de l'énergie. **La compression des muscles favorise la récupération** en consentant une plus rapide ré-absorption de l'acide lactique. Ergonomie, liberté de mouvement et réduction de la dépense physico-énergétique.

MADE IN ITALY

3D Wear: comodi come la tua pelle.

 I capi 3D Wear sono caratterizzati dall'utilizzo di filati in Nylon, Lycra, Tactel e Meryl: elastici, flessibili, messi a punto per chi non ama le costrizioni.

La tecnologia Seamless elimina infatti le cuciture e consente la perfetta aderenza degli indumenti e la totale armonia tra corpo e tessuto. Ogni gesto atletico viene accompagnato ed esaltato dalla struttura dei capi, che risultano leggerissimi, di ottima durata, di facilissima manutenzione ed asciugatura.

Prodotti ideali, che fasciano senza stringere, con inserti traspiranti che permettono una maggiore circolazione dell'aria e la fuoriuscita del calore in eccesso.

3D Wear: second skin comfort.

 3D Wear garments are characterised by the use of Lycra, Tactel, Meryl and Nylon yarns, which combine to produce elastic and flexible garments, developed for those who prefer a looser fit.

Seamless technology actually eliminates stitching, allowing for the perfect adherence of the garment and the total harmony of body and fabric.

3D Wear Seamless accompanies and emphasises every movement, with breathable inserts which allow greater air circulation and the escape of excess heat. It is like a second skin as it is made to be very light, wrinkle-free, hard wearing and easy to look after and dry.

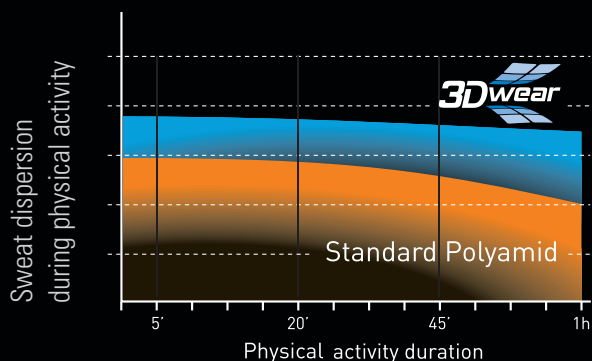

3D Wear: confortable comme ta peau.

 Les produits 3D Wear sont caractérisés par l'utilisation de filés en Nylon, Lycra, Tactel et Meryl : élastiques, flexibles, mis au point pour qui n'aime pas les contraintes.

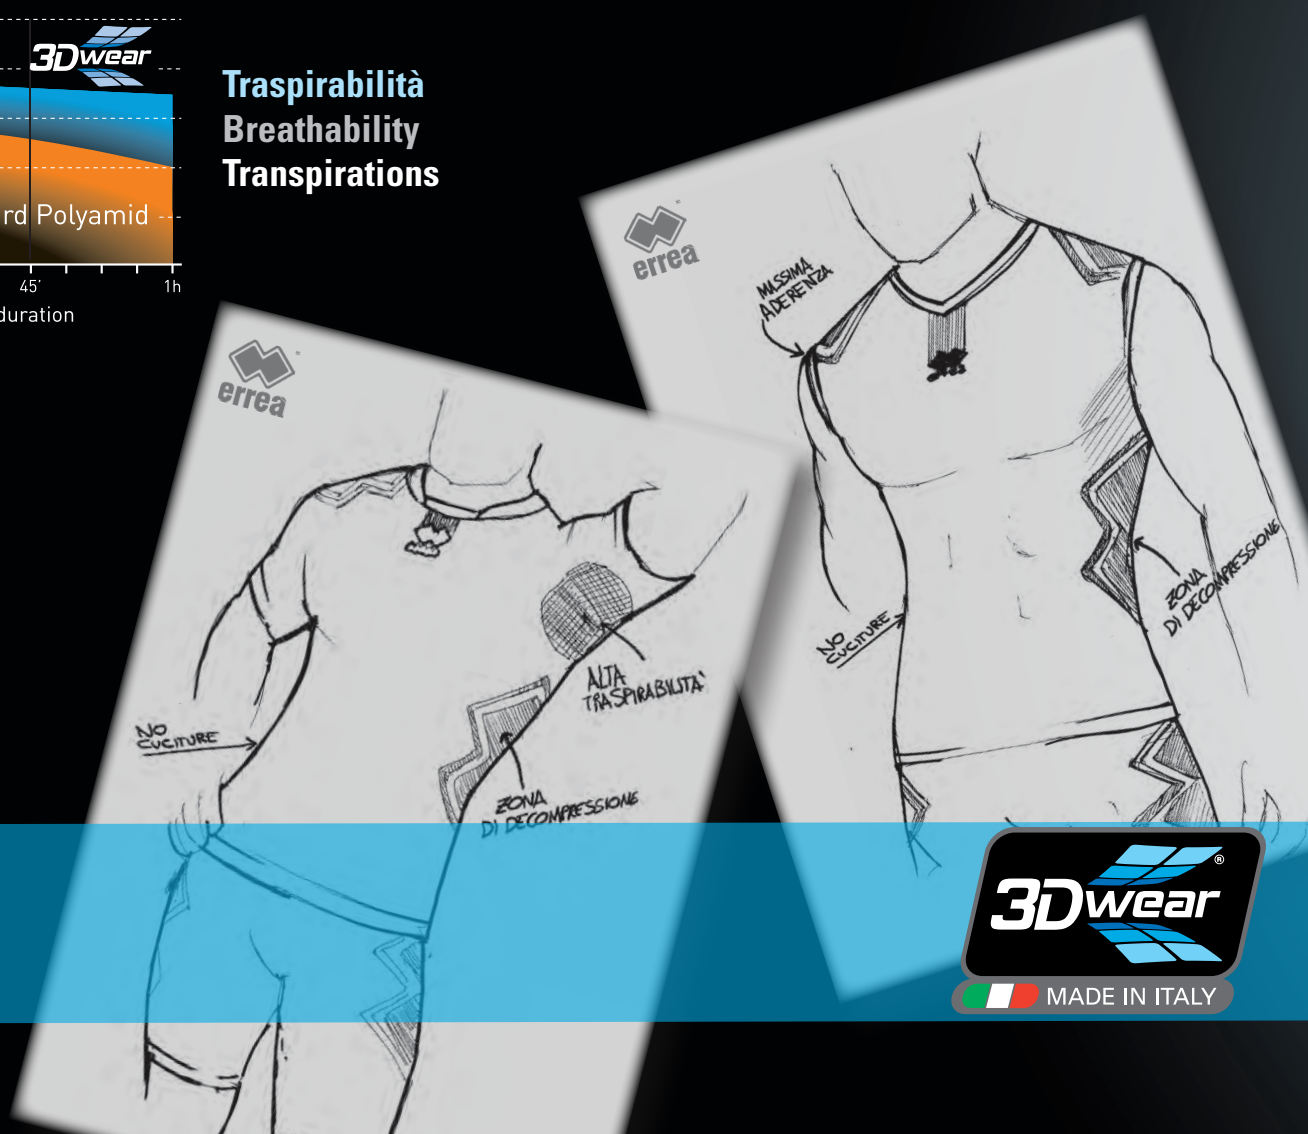

La technologie Seamless élimine les coutures et permet une parfaite adhérence des vêtements et la totale harmonie entre le corps et le tissu.

Tout geste athlétique est accompagné et aidé par la structure des vêtements, qui résultent très légers, d'une très bonne durée et de très bonne manutention et rapide à sécher.

Produits idéals, qui entourent sans serrer, avec insertions transpirantes qui permettent une majeure circulation de l'air et la dispersion de l'excédent de chaleur.
